

GFCAMTM Tapeless Workflow seminar at Cologne, Germany

On Mar 23, 2011 we have had a seminar for GFCAM at Mediatec in Cologne (<http://www.mediatec.de>) who is Ikegami's local dealer in Germany.

From 13:00 the seminar had been taken place with 2 sets of [GFCAM HDS-V10](#), [32GB GFPAK](#), [CF Adaptor](#) with 32GB CF card and [HLM-2450W](#) 24" monitor as well as AVID Media Composer.

The seminar was made based on following curriculums. Ikegami's sales Staff, Jörg Majerhofer explained as a lecturer.

- Introduction of the system
- Connections and the post-production with AVID
- Technical specification for GFCAM
- User-Data
- User-Menu
- About METADATA
- Clip Repair
- About Media Managers
- Bluetooth function
- Proxy operation
- User-Data storage in USB

Mr. Majerhofer talked about GF with projector

Customers seriously listened to what lecturer told

Camera signal (HD SDI) was output on LCD monitor

Until around 17:00, the seminar was made with a lot of Q & A as well as actual operation of the camera, [GF MediaManager](#) and [GF Assist](#) with bluetooth operation.
